

SAHIL ABDUL YUNUS

Full Stack Web Developer

📞 +91 8010831493 📩 Sahilabdul264@gmail.com 🌐 [portfolio](#) 🌐 [LinkedIn](#)

SUMMARY

Full Stack Developer with expertise in **MERN stack** and **Next.js**, building scalable, secure, and high-performance web applications. Skilled in front-end and back-end development, focusing on clean code, user experience, and modern technologies. Experienced in integrating **AI-powered features** like Gemini-based message suggestions to enhance functionality.

SKILLS

Backend :-, Node.js, Express.js, JavaScript, Next.js

Frontend :- , JavaScript, React.js, Redux, Bootstrap, Tailwind, Next.js

Database :-, MySQL, MongoDB

Programming :-, java, C++, C, git, GitHub

PROJECTS

Anonymous Feedback Website

📅 11/2025 - 12/2025

Send and receive anonymous feedback effortlessly. Our Next.js MERN app ensures secure, real-time communication, letting users share thoughts without revealing their identity. It also includes **AI-powered message suggestions using the Gemini model** to help users craft thoughtful feedback.

- Integrated **AI-powered message suggestions** using the Gemini model.
- Implemented **user authentication and authorization** with Express.js and JWT for secure access.
- Built a **robust backend** using Express.js and MongoDB to handle feedback storage, retrieval, and user management.
- Enabled **real-time updates** for instant feedback delivery.
- Added features to **toggle acceptance** of messages and **delete unwanted feedback**, ensuring user control.

Video Streaming Platform

📅 07/2025 - 08/2025

A full-stack video streaming platform built with the MERN stack, allowing users to upload, watch, like, comment, and subscribe to videos. Includes an integrated tweets feature for sharing short updates and engaging with the community.

- Developed the front-end using **React.js** and **Tailwind CSS**, ensuring a modern and responsive UI across all device sizes.
- Implemented **JWT-based authentication** for secure user signup, login, and protected routes.
- Built core video features including **upload, watch, like, comment**, and **subscribe**, enabling full user interaction.
- Added a custom **tweet-like feature**, allowing users to post short updates or reactions within the platform.
- Designed user profiles and dashboards for managing uploaded videos, subscriptions, and personal tweets.

Hotel connecting website with Authentication

📅 01/2025 - 02/2025

A full-featured hotel connecting application enabling users to register, authenticate, and manage their hotels related posts seamlessly

- Developed the front-end using Bootstrap, creating a responsive and intuitive user interface
- Implemented user authentication and authorization using express.js, ensuring secure access to the application
- Managed the backend entirely with express.js, handling database with MongoDB, retrieval, and user management efficiently
- Includes a powerful search feature, allowing users to filter accommodations based on country
